

FULLY VACCINATED

what happens now

You are considered fully vaccinated for COVID-19 ≥ 2 weeks after you have received the second dose in a 2-dose series (Pfizer-BioNTech or Moderna), or ≥ 2 weeks after you have received a single-dose vaccine (Johnson and Johnson).

WHAT YOU CAN DO

- Visit with other fully vaccinated people indoors without wearing masks or physical distancing
- Visit with unvaccinated people from a single household who are at low risk for severe COVID-19 disease indoors without wearing masks or physical distancing
- Refrain from quarantine and testing following a known exposure if asymptomatic

WHAT YOU NEED TO CONTINUE

When in public spaces, visiting with unvaccinated people from multiple other households, and when around unvaccinated people who are at high risk of getting severely ill from COVID-19

- Wear a well-fitted mask.
- Stay at least 6 feet from people you do not live with.
- Avoid medium- and large-sized in-person gatherings.
- Get tested if experiencing COVID-19 symptoms.
- Follow guidance issued by individual employers.
- Follow CDC and health department travel requirements and recommendations.

If it has been less than 2 weeks since your shot, or if you still need to get your second dose, you are NOT fully protected. Keep taking all prevention steps until you are fully vaccinated.
